About

Hello! I'm Logesh Thulasiraman, a polyglot full stack developer who enjoys building things that live on the internet. I have experience in developing and designing software for both web and mobile application.

I have been coding for almost 5+ years now and I have a strong interest in solving conceptual and analytical problems. I am an enthusiastic learner, and believe that learning grows by sharing. I have good exposure to cloud architectures. I love exploring and experimenting new technologies.

Experience

Nielsen
02/2019 - Present

Software Engineer

Nielsen, is a global marketing research firm. We attempt to provide clients with valuable insights into consumer behavior and marketing information.

We provide a truly complete picture of the complex and changing marketplace that manufacturers and retailers need to innovate and grow their businesses.

- Developing data pipelines to derive meaningful conclusion out of retail sales data.
- Building a custom version of airflow to run with kubenetes, which can auto scale up and down depending on the demand.
- Developing web application to display visulization of the FMCG sales data.

Xome
01/2018 - 02/2019

Software Engineer

Xome is a platform to buy your new home, sell your old one, find an agent, view virtual tours, & receive homes by e-mail.

- Built an crm (customer relationship management) mobile app for real estate agents.
- Worked with a variety of platforms in building a hybrid mobile app.
- Developed a CRM application using node js and react native.
- Built agent assignment and followup micro service for CRM.
- Architected and shipped the mobile app to both android and ios stores.

Broadsoft (Acquired by Cisco)
07/2017 - 01/2018

Software Developer

Team-One is a business collaboration app that can drive and enhance business productivity, making teamwork simple both inside and outside the organization.

- Developed real time messaging platform similar to slack.
- Worked on real time messaging and video streamings.
- Developed web application, mobile and desktop application for both windows and mac using electron js.
- Proposed and built a market place, allowing users to build extensions of their own.

AthenaHealth
07/2015 - 07/2017

Programmer

Athena Health provides network-enabled services for healthcare and point-of-care mobile apps in the United States.

- Worked in building an electronic health record system for hospitals.
- Built an extensive testing framework for testing EHR products.
- Built continuous integration and deployment pipelines.
- IOT integrations - recording patients vitals from devices.

Education

Anna University
04/2011 - 05/2015

Bachelor Electronics and communication Engineering

Awards

Gold Simply Excellent Award
Nielsen

During the last couple of months, when the team was in crisis mode, Logesh stepped in, helped solve the issues with a whatever it takes attitude to debug, figure out the root causes, fix them.

Spot Light Award
AthenaHealth

Was awarded this award for building an automated testing framework for testing EHR products.
